

PIONEERING SAFETY

Advanced Vascular Access

Clinical-grade design blueprints engineered to protect human health and advance patient outcomes across global medical ecosystems.

01 The Safety Philosophy

At Polymed, we believe clinical intervention should heal without risk. Across thousands of hospitals worldwide, our safety devices protect patient health and prevent accidental needle-stick exposures for frontline healthcare workers.

Corporate Pillars

Uncompromised Quality Standards

Every product conforms to ISO 13485 regulations and CE requirements, undergoing multi-stage visual and mechanical testing.

Clinical Innovation

Dedicated R&D teams collaborate with leading clinicians to prototype and iterate medical designs that simplify complex procedures.

02 Table of Contents

This catalogue presents clinical-grade product listings and technical specification matrices designed for medical procurement teams, distributors, and department heads.

DOCUMENT NOTE

Product configurations and medical device parameters are subject to local regional regulations and clearances.

03 Global Infrastructure

As a premier medical device manufacturer, Polymed operates advanced tooling, high-precision injection moulding, and automated assembly plants. Our multi-plant layout supports rapid scaling for worldwide healthcare systems.

Manufacturing Excellence

Polymed integrates modern tooling technology, high-speed automated assembly, and sterile cleanrooms to output millions of medical units annually.

By manufacturing our own tooling and precision injection moulds, we control dimensional tolerance down to the micron and maintain absolute consistency across production lots.

04 Compliance & Certifications

Quality control is built directly into our process logic. Our cleanroom facilities conform to ISO Class 8 requirements, strictly monitored for particulates, humidity, and biological contaminants.

Validation & Metrology

We conduct 100% inline leakage inspections, pressure decay testing, and microscopic surface verification to assure absolute defect-free product delivery.

Raw materials are checked for biocompatibility under USP Class VI guidelines, ensuring zero toxic extractables or patient sensitivity issues.

Standard Certifications

ISO 9001:2015 Certification

ISO 13485:2016 Medical Quality Standard

CE Mark Compliance for Europe

US FDA Registration Compliance

Cleanroom Particle Count Verification

PRODUCT LINE 01

Infusion Therapy & Vascular Access

Precision engineered safety I.V. cannulas and needle-free connector systems designed for optimal fluid delivery and healthcare safety.

05 Safety I.V. Cannula (Adva Series)

Specially designed safety I.V. cannulas featuring our self-activating needle shield technology. Engineered to drastically lower needle-stick injury rates for frontline clinical personnel.

Polywin Safety Cannula

REF CODE: 1101-1104 / ADVA

- Eliminates accidental needle exposure upon needle extraction.**
- Self-Activating Guard:** Automatic shield deploys over the needle tip upon withdrawal, locking permanently.
- Adva Flashback Chamber:** Transparent barrel provides instant visual verification of successful vein entry.
- Tapered FEP Catheter:** Medical-grade, kink-resistant catheter with ultra-smooth surface properties.
- integrated Port & Wings:** Snap-fit color coded wings for sterile site fixation.

SIZE (GAUGE)	COLOR CODING	CATHETER O.D. x LENGTH	CLINICAL STANDARD
			Color coded according to ISO standards from 14G (Orange) to 26G (Violet) for clear, instantaneous gauge identification.
14G	Orange	2.0 x 45 mm	305 ml/min
18G	Green	1.3 x 45 mm	95 ml/min
20G	Pink	1.1 x 32 mm	65 ml/min
22G	Blue	0.9 x 25 mm	36 ml/min

PRODUCT LINE 02

Anaesthesia & Urology Management

Clinical airway management devices, closed-system suction catheters, and measured volume urine collection systems.

06 Airway Management & Drainage Systems

Highly engineered disposables designed to support respiratory function, provide airway access, and ensure aseptic closed urine drainage.

ENDOTRACHEAL TUBE

Endotracheal Tube

REF: 2015 / 2016

- Siliconized PVC with soft atraumatic eye.
- Thermoplastic material conforms to airway.
- Available in cuffed and plain versions.

High volume, low pressure cuff prevents tracheal trauma.

CATHETER MOUNT

Catheter Mount

REF CODE: 2018

- Double-swivel connector for positioning.
- Compatible with ISO medical connectors.
- Kink resistant corrugated tubing.

Reduces mechanical stress on the tracheostomy.

POLYURIMETER

Polyurimeter Bag

REF CODE: 3011 / 3013

- 2000 ml capacity bag with measured chamber.
- Aseptic sampling port and anti-reflux valve.
- Clear graduated scales for tracking.

Prevents ascending urinary tract infections.

PRODUCT LINE 03

Renal Dialysis & Blood Management

Hemodialysis catheter kits, safety fistula needles, blood collection tubes, and closed-circuit blood bags.

07 Hemodialysis Catheter & Access Kits

Premium vascular access catheters and dialysis components designed to withstand high flow rates during renal therapies, minimizing vessel friction and thrombotic risks.

Haemocent Catheter Kit

REF CODE: 11110 / HAEMOCENT

- Designed to maintain vascular integrity and ensure high flow rates.
- **Biocompatible Polyurethane:** Thermosensitive catheter body softens inside the vessel for safety.
 - **Coaxial Lumen:** Direct dual flow with low recirculation rate.
 - **Flexible J-Tip Guidewire:** Facilitates easy, atraumatic wire passage.
 - **Complete Insertion Set:** Includes dilator, valved introducer syringe, and scalpel.

RENAL PRODUCT NOTE

Available in single, double, and triple lumen configurations. Features rotatable suture wing tabs to facilitate easy anchoring and secure site fixation.

CONFIGURATION	SIZE (FR)	LENGTH (CM)	GUIDEWIRE DIAMETER
Double Lumen	8.5 Fr	13 / 16 / 20 cm	0.035 inch
Double Lumen	11.5 Fr	13 / 16 / 20 cm	0.035 inch
Double Lumen	12.5 Fr	13 / 16 / 20 cm	0.035 inch
Triple Lumen	12.0 Fr	13 / 16 / 20 cm	0.035 inch

POLYMED+

WE CARE AS WE CURE

Thank you for choosing Polymed as your trusted partner in patient care.
Together, we continue to engineer and deliver clinical safety solutions that protect and heal patients globally.
